

# NATURAL FULL FLAVOR AMERICAN BLEND

**RED RIBBON**

**The Full Flavor Natural American Blend is a combination of Flue-cured, Burley & Oriental tobacco leaves. This is just natural tobacco without chemical additives. It is premium tobacco. The mid-rib stem of the tobacco leaf has been removed. It is called STRIP TOBACCO in the tobacco trade. Marlboro is an American Blend cigarette.**

# NATURAL BLUE AMERICAN BLEND

## BLUE RIBBON

**This blend is made from the same tobacco leaves as the Full Flavor American Blend but in a different combination of leaves. The difference between full flavored blends & this blend is in the impact or strength of the smoke. The full flavored blend of leaves is a more full bodied taste with more flavor than the Blue Ribbon blend. The Blue Ribbon blend is slightly sharper and is lower in nicotine content. It is like the difference between a robust Brazilian coffee & a slightly weaker Costa Rican coffee.**

# NATURAL VIRGINIA BLEND

**GREEN RIBBON**

**The Natural Virginia Blend is an English Blend. The terms are interchangeable. The English prefer an all Flue-cured (Virginia) & Oriental blend over an American Blend (which also includes Burley). The Natural Virginia blend is for the smoker who prefers a traditional “old world smoke”. American Spirit is an English Blend.**

# NATURAL ORIENTAL BLEND

## PURPLE RIBBON

**The Natural Oriental Blend is an exotic change of pace over other cigarette choices. Natural Oriental Blend is a departure from the mainstream cigarettes available today. This is a distinctly different blend of tobacco. It has unique taste characteristics, yet has the same impact & cleanliness of taste as the other blends.**
